**CHANGE YOUR SMOKE ALARM BATTERIES**  
**WHEN CHANGING YOUR CLOCKS THIS SUNDAY**

*State Fire Marshal Encourages Working Smoke Detectors and an Escape Plan*

State Fire Marshal Larry Flowers is reminding Ohioans to make a potentially lifesaving change when they move their clocks back one hour on **Sunday, November 2: Change the batteries in your smoke alarms!**

In conjunction with Ohio's fire departments, the Division of State Fire Marshal encourages Ohioans to make a habit of changing the batteries in their smoke detectors at least twice a year – at the beginning and end of daylight savings time.

“We had the lowest number of fire fatalities in 27 years last year with 105. However, that’s still 105 too many,” said Marshal Flowers. “So, I’m challenging Ohioans to protect their homes and families through the simple act of changing out their smoke alarms’ batteries. Paired with a well-practiced escape plan with two ways out save lives.”

Marshal Flowers said firefighters still find that smoke alarms are often not present in homes or are not functional. Data showed that in an overwhelming majority of incidents where there was a fatality, there was no evidence of a working smoke alarm.

Smoke alarms, when properly installed and maintained, provide early warning when fire occurs. For the greatest protection, install a smoke detector on every level of your home and inside each sleeping area. Also, develop an escape plan with two ways out and make sure every family member knows what to do and where to meet outside if the fire alarm sounds.

Marshal Flowers offers these additional tips:

- Test smoke alarms at least once each month to ensure that they are working properly.
- Vacuum the dust from inside the detector at least once every year.
- Never “borrow” a smoke detector’s battery for another use.
- Change batteries twice a year or if a detector “chirps” to signal low battery power.
- If you have a smoke alarm that was installed before October 31, 2004, completely replace the unit this weekend.
